

ODBCLink/SE Upgrade Program

The Power of Integration®

Limited Time Offer

ODBCLink/SE is a Special Edition of MB Foster's UDA series product line and was developed for Hewlett-Packard (HP) by MB Foster. Starting in 1996, ODBCLink/SE was distributed to HP customers as part of the HP 3000 IMAGE/SQL and HP 3000/HP-UNIX ALLBASE/SQL operating system bundle.

The Facts:

- On December 31, 2006 HP ceased to distribute and bundle ODBCLink/SE with the operating system
- Updates, patches and support for ODBCLink/SE are no longer available from HP
- ODBCLink/SE only supports 32-bit desktop and windows server environments

How Can MB Foster Help?

For qualifying ODBCLink/SE customers and as the original manufacture of ODBCLink/SE we recommend an upgrade to UDALink. UDALink includes the following:

- Host based report-writer
 - A general-purpose data extraction, manipulation, interchange, download and reporting system
- Read and Write ODBC access
 - 32 bit ODBC
 - 64 bit ODBC
- Read and basic JDBC write access
 - Insert, Delete, Update
- HP3000 Sources
 - Image, TurboImage, Image/SQL, Allbase
 - KSAM, MPE files
 - Powerhouse PDL
 - Suprtool-SD

Over 30 years of customer experiences and knowledge of the HP 3000 and its data sources is conveniently packaged into UDALink. No other product can offer this breadth of knowledge while remaining flexible, open and up-to-date.

This limited time offer allows ODBCLink/SE customers to upgrade at 50% of the UDALink tiered platform list price, plus an annual License-To-Use maintenance and support fee.

Reasons to Select MB Foster and UDALink

- MB Foster has three decades of experience looking after customers and reliably delivering data for customers in mission critical environments
- UDALink is installed at numerous HP 3000 sites around the world delivering millions of ODBC and JDBC transactions every day
- UDALink offers significant new capabilities for data access to your HP 3000 information via ODBC and J2EE/JDBC
- A support contract with MB Foster provides you with access to a skilled technology team with hundreds of years of cumulative HP 3000 operational and database experience
- Leverage an investment in UDALink with other complementary MB Foster solutions: MBF-Console, JDBC2, PRC's, UDASynch, and UDACentral
