

MBF-UDACentral - Workbench and Server

Centralized Data Access and Management - Explore, Clean, Migrate

Every day, of every week Information Technology professionals are responsible for migrating data and making data more available. The biggest hurdle is identifying and managing the risk of migrating data. By providing a visual workbench to develop the transformations, while taking care of the nuances across O/S's and database platforms MBF-UDACentral reduces the risk, and allows processes to be automated.

Business Answers

UDACentral Workbench and Server is a powerful, easy to use, data migration solution for multi-platform, multi-database environments. UDACentral will change the way you do things and increase your ability to leverage enterprise data assets – for integration, migration or just because you need data for a special project.

UDACentral overcomes common data migration problems

- Implementation of a new application; Where data for the new application comes from within existing applications
- Migrating from one application to another; Critical data is required for the successful operation of the company
- Upgrading from one version of an application to another; Where the data format has changed

- Arduous task of identifying and removing redundant data; Databases developed over decades have large amounts of duplicate data
- Implementing master data management; Physical movement of data requires ETL
- Data validation is an audit or compliance requirement which is not being met
- Manual extraction and import process consumes valuable time; Volume of data is extensive, project timelines cannot be met

Proven Technology

UDACentral supports the following databases and any other database that provide a JDBC connection.

Source Database	Target Database
Oracle	Oracle (version 8i, 9i, 10g)
IBM-DB2	MS SQL Server (2000, 2005, 2008)
MS SQLServer	MYSQL (5.1.4x)
MYSQL	Sybase (SQL Anywhere, Jconnect)
Sybase	Ingres (10.0.x)
CACHE	IBM-DB2 (Universal and AS/400)
Image (HP3000)	Eloquence
Allbase (HP3000)	Progress (OpenEdge 10.2B)
KSAM (HP3000)	PostgreSQL
Eloquence	
Progress	
PostgreSQL	

UDACentral runs on Windows, HP-UX, LINUX, and any other operating system that supports the Sun Java Developers Kit (JDK).

About MB Foster

MB Foster has three decades of experience extracting, transforming, cleaning and moving data into application databases. We have been the trusted advisor to customers ranging from local government to Global 100 enterprises. Our personalized service has proven time and again that we listen to our customers and then find the right service strategy to provide solutions that solve their business and information technology challenges today and into the future.

Whether it is a software product, migration project, data services, or project management, we make it easy for customers to deliver the right information to the right person at the right time. We work with our customers to streamline their IT business operations to reduce costs, improve delivery, and grow revenues. Learn more at www.mbfoster.com or simply call us at 1-800-ANSWERS – that's 1-800-267-9377.

Your data - the way you want it!

The Power of Integration ®

UDACentral - Features

Database Explorer:

- Displays all databases, tables, columns, keys, indexes and data, providing all necessary information of where data is stored and how.

JDBC Explorer:

- Reports the JDBC versions and methods, data type supported, meta-data and limits

Export:

- Extracts data from databases into XML, CSV and HTML format.
- Send query results to an email address.
- Converts database tables to SQL

Import:

- Data from XML, CSV files into tables
- Saved SQL can be used to create a new table or view

XML Mapper:

- Define databases and save in XML format

Migrate:

- Convert databases from one type to another
- Tables, columns, indexes and constraints are converted

Inquire:

- Add, update and delete any data – using primary key or unique index
- Compose, save, record and edit SQL queries
- Read databases simultaneously

Whether MB Foster is providing data migration services or solving critical data problems, we are 100% customer driven.
