

MBF-UDA-Reporter-UX/Eloquence

The Power of Integration ®

Centralized Data Access and Management

UDA-Reporter version 7.06 is the most flexible and open solution for data access and delivery on HP Integrity Servers running Eloquence databases from Marxmeier AG. UDA-Reporter works with any desktop environment: Terminal, PC or Macintosh and is a powerful report writing solution optimized for high performance transactional environments.

MBF-Reporter makes it possible to analyze the vast stores of data in Eloquence databases quickly and reliably produce information that enterprises need to satisfy their end users and executives, as reports or data extracts.

With its straightforward installation, intuitive user interface and shorthand commands, you can begin using UDA-Reporter immediately. Combine open security with excellent reporting functions and you have an "easy to learn and easy to use solution that provides sophisticated data access manipulation and extraction."

Key Uses

- Perform ad-hoc or production (month-end) reporting
- Customize reports and view the results immediately
- Data cleansing
- Create, distribute and manage reports
- Perform data extracts into Excel and PC apps
- Reformat dates
- Eliminate redundant data reads
- Direct automatic downloading to PCs or Apple Macintosh with Reflection

Additional Features

- Reading can be restricted to the first/last record in a chain.
- Performs computations only on selected data.
- Arithmetic computations (plus, minus, divide, multiply, exponentiation)
- String handling computations (sub-strings, stripping, concatenation)
- Date reformat facilities (e.g. YY/MM/DD to DD/MM/YY).
- File set linkages through paths defined in the Eloquence database root file
- Percent and ratio calculations by sort-break

Supported Systems

HP-UX: PA-RISC
HP-UX: Itanium

Supported Input

Eloquence
C-ISAM, D-ISAM and flat files with FDGEN
Self-Describing (SD) files

Supported Output

Self-Describing (SD) files
ASCII, C-ISAM, D-ISAM files
Subfiles
Reports on the screen and/or printer
Export/download to XLS (Excel), XML, CSV, PDF
Deliver output via e-mail

Additional Option

Cross Reference Utility (XREF)
- Maintain procedure catalogs

About MB Foster

MB Foster has three decades of experience extracting, transforming, cleaning and moving data. We have been the trusted advisor to customers ranging from local government to Global 100 enterprises. Our personalized service has proven time and again that we listen to our customers and then find the right service strategy to provide solutions that solve their business and information technology challenges today and into the future.

Whether it is a software product, migration project, data services, or project management, we make it easy for customers to deliver the right information to the right person at the right time. We work with our customers to streamline their IT business operations and improve delivery. Learn more at www.mbfoster.com or simply call us at 1-800-ANSWERS – that's 1-800-267-9377.

Your data - the way you want it!

"In a report we want to combine all the information, sometimes we have to write programs, because of the nature of the way we want to extract data." More often than not, we can use UDA-Reporter.

Simon Chandler – Warner Brothers

UDA-Reporter - Features

File Definition Generator (FDGEN):

- A mini-dictionary
- Describe C-ISAM, D-ISAM, flat files and Eloquence tables

MBF-Maintenance (MBFMAINT):

- Extensive configuration tool
- Providing numerous configuration parameters to effectively manage user environments

Security:

- Maintain control of your security
- Restrict access by database, field, field value, extract file size or users

Profiles: Interactive Batch allows you to run procedures on-line, provide selection criteria and then launch a batch process giving MIS the ability to defer the request to off peak hours.

- Run entirely in a batch job
- Launch batch procedure execution from on-line
- Customize job to include "execute at" time when submitted on-line

Views: Reduce navigation and provide specific user access to required data, including linkages and additional security

- Three levels of security access – password protection
- Operates within HP-UX file security
- Additional security at file, field or value of field level
- Security by user or custom user profile
- Restrict reads/writes by user and variable between batch and on-line
