

REVEAL™ OPTIONAL MODULES

"Reveal Vital Statistics gives me a wealth of report activity detail (generation, date, time, page, security). We have learned, that only about 5 percent of our reports are actually accessed."

REVEAL helps everyone in your business work smarter and more productively with unparalleled enterprise document handling features. Optional modules extend the functionality of Reveal's core features allowing you to further enhance the value of enterprise report distribution and warehousing across your business. Reveal options are easy to install. They integrate seamlessly and deploy automatically.
