

# MBF-UDALink-UX

## Efficiently Deliver Application Data

UDALink-UX is used in Manufacturing, Healthcare, Travel Agencies and local government. It provides a unique blend of report-writing and ODBC/JDBC client server access allowing you to harness the power of your business.

## Business Answers

UDALink-UX can take advantage of numerous file types to deliver real-time access to data, populate web pages, create production reports, update values, deliver data marts and database loader files, reformat reports for import into desktop applications or deliver data to common decision support and Business Intelligence (BI) solutions.

UDALink-UX is proven to deliver a return on investment as it offers significant capabilities for data access to HP UNIX and facilitates every member of the organization for one low cost.

## Proven Technology that Delivers

- Host (server) based report-writing and data manipulation
- Real time client server access to data
- Integrate Web Applications
- Perform ad-hoc or production (month-end) reporting
- Data cleansing
- Build and implement a custom data repository

## Key Features

- Client Server Access
  - Read and write 32 bit ODBC access
  - Read and write 64 bit ODBC access
  - Thread safe
  - Retrieve data into common desktop reporting software (Excel) or popular BI solutions
  - Save and re-run SQL queries at anytime
  - JDBC access
  - Send and receive files from host server
  - Link SQL to non-SQL data sources – use it to access flat, C-ISAM, D-ISAM files as if they are tables
- UDA-Reporter
  - Output to XLS (Excel), XML, HTML, CSV, PDF and more
  - Computational expressions - use it to perform arithmetic computations and summary functions on numbers and strings
  - Wild card retrievals
  - Criteria specification embedded or supplied at run time

## Sources

- HP-UNIX: PA-RISC and Itanium
  - Allbase on PA-RISC, Oracle, Eloquence
  - ASCII, Bytestream files
  - MBF-File Definitions (MBF-FD)
  - MBF-Sub Files (MBF-SF)
  - Suprtool-SD and other self describing files
  - Comma delimited files
  - User defined sequential files

## About MB Foster

MB Foster has three decades of experience extracting, transforming, cleaning and moving data. We have been the trusted advisor to customers ranging from local government to Global 100 enterprises. Our personalized service has proven time and again that we listen to our customers and then find the right service strategy to provide solutions that solve their business and information technology challenges today and into the future.

Whether it is a software product, migration project, data services, or project management, we make it easy for customers to deliver the right information to the right person at the right time. We work with our customers to streamline their IT business operations and improve delivery. Learn more at [www.mbfoster.com](http://www.mbfoster.com) or simply call us at 1-800-ANSWERS – that's 1-800-267-9377.

*Your data - the way you want it!*

*The Power of Integration ®*

### UDA Series Modules

**J2EE/JDBC** – use it for web access to internal enterprise data sources. Supports pool connections, JavaBeans, JNDI, EJB and more

**MBF-Console** – use it to start/stop logging for a single process, optionally “kill” a single process (PIN/PID) without restarting the listener and more

**MBF-RPC (Remote Procedure Call)** - use it to enable existing application code in C or COBOL routines to be incorporated into your client server applications and .Net environment as libraries.

**MBF-SSL (Secure Socket Layer)** – use it to ensure data security – authentication and encryption

**MBF-2PC (Two Phase Commit)** - Guarantee transactional integrity with Allbase on PA-RISC

**UDACentral** – use it to explore, clean and migrate data to numerous relational databases

**UDASynch** – use it to replicate or synchronize HP-UX databases with Oracle, SQL Server, MySQL and more

*“With UDALink we realized costs savings, increased efficiencies, reduced development time and are uniquely positioned to grow with the technology as our user needs and requirements grow.” Ray Jozwiak, Manager of Technology*
